ITU-USTTI EMERGING TECHNOLOGIES ACCELERATING THE DIGITAL TRANSFORMATION PROCESS

This joint ITU-USTTI event provided regulatory officials with information and insights on how emerging technologies can accelerate the digital transformation process, and how such smart technologies and innovation have strengthened digital resilience. This training session saw subject matter experts further discuss how these emerging technologies interact with key policy and regulatory trends.

This webinar came at a time when COVID-19 has highlighted the strategic importance of Information and Communication Technology (ICT) networks and services for society and economies around the globe.

TUESDAY, 22 JUNE 2021

13:00 - 14:30 GMT+2 **THE ROAD2ADDIS SERIES - LEAD2CONNECT EVENT**

This session of the Road to Addis series focused on Leadership as a driving force to achieve digital transformation and universal connectivity.

The session was part of the Global Symposium of Regulators (GSR) 2021 core sessions programme. It featured leaders from different disciplines who can share valuable lessons

about their own experience accomplishing the unimaginable, providing insight and inspiration to Symposium delegates around the world.

The session aimed to answer the following questions:

- What constitutes a great leader today and what skills will be required for the leaders of the future?
- What kind of leadership is needed to enable the digital transformation of an entire planet?
- What leadership lessons can be applied to solving the universal and inclusive connectivity challenge by 2030?
- What does it take to help people accomplish the unimaginable?

Session Objectives:

- Identify the leadership principles that are required to achieve universal and inclusive connectivity and the accomplishment of the SDGs.
- Inspire attendees of the GSR and the global online community with real life examples of global leaders from different spheres that have accomplished the unimaginable.
- Share leadership lessons from different sectors and assess how they can be applied to connectivity for sustainable development.

Biography

The pandemic has showed how important it is for governments to proactively and timely shape the development and deployment of ICT policies and regulatory approaches in times of crisis. **COVID-19 has inevitably affected individuals, families, and organizations across industries, geographies, and demographics.** As we prepare for the post-pandemic era, it will **require enormous investments** and efforts and a shared vision amongst stakeholders to **forge the right kind of partnerships** that may lead to resilient sustainable development.

Within this perspective, the voice of industry and private sector in sharing challenges and lessons learned brings an important perspective to policy and regulatory debate. **IAGDI-CRO met, debated and shared views and lessons learned from the prevailing COVID-19 situation and how this has impacted business.** Thought leaders used this opportunity to propose policy and regulatory adjustments that could help business to recover and thrive under new collaborative and partnership approaches.

NETWORK OF WOMEN FOR WTDC (NOW4WTDC): 'PROMOTING WOMEN LEADERSHIP
IN THE ICT REGULATORY AND POLICY SPACE'

The Network of Women for WTDC (NoW4WTDC) is a platform for collaboration and exchange of information to increase the number of women participating in ITU-D meetings . It is also a platform to encourage more women to take up leadership roles, such as committee chairs, working group chairs in the conference structures, and other management roles in the preparatory processes for the WTDC itself, and beyond. It provides the opportunity to share important lessons in a supportive community including mentorship.

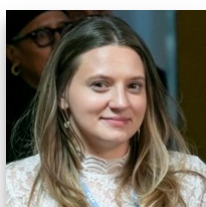

The objective of the side event was to spark conversations that infuse diverse perspectives from experiences to help build capacity of potential women leaders in National Regulatory Agencies, ICT policy agencies and in the industry in general.

The topic of discussion at the side event during GSR 2021 were: "Promoting women leadership in the ICT regulatory and policy space." The session featured three female leaders in a fireside chat. It allowed these leaders to share their perspectives and journey in leadership in the ICT industry, and also share experiences helpful in encouraging appropriate measures that will enable more women to ascend into executive roles.

In addition to the launch of the mentorship programme and the call for mentors in May 2021, the call for mentees was made at this 24 June side event. The ITU Telecommunication Development Bureau (BDT) also released the results of the survey on the call for mentors, as well the survey carried out to seek views of members on preferred communication platforms.
