## AFRICAN PLAN

FOR THE DISTRIBUTION OF FREQUENCIES, IN THE BANDS 150 - 285 KC/S  
AND 415 - 1605 KC/S, FOR THE STATIONS OF  
THE AFRICAN AREA

---

### PREAMBLE

### SECTION I

#### GENERAL PROVISIONS

##### Article 1

##### DEFINITIONS

1. In this Preamble and the frequency assignment Plan which follows it, technical terms are used in accordance with the definitions contained in Article 1 of the Radio Regulations of Atlantic City (1947). Any necessary additional definitions are given in paragraph 2 of this Article.
- 2.1 The word "Plan" denotes the African Plan.
- 2.2 The words "African Area" denote that area of Region 1 outside the European Area as considered at Copenhagen, South of Latitude 30°N but including the whole of Iraq, taking into account the difference between the Broadcasting and Maritime Areas as defined at Copenhagen.
- 2.3 The words "Radio Regulations" denote the Radio Regulations of Atlantic City (1947).
- 2.4 The word "power" denotes the mean power of a radio transmitter as defined in paragraph 63 of the Radio Regulations.

##### Article 2

##### POWER

The power of stations mentioned in the Plan can be altered only by mutual agreement between Administrations affected, and on condition that experience supported, as far as possible, by measurements shows that this alteration is useful and necessary.

Article 3

USE OF FREQUENCIES

1. In the Plan, frequencies in the bands 415 - 490 kc/s and 510 - 525 kc/s allocated for radiotelegraphy in the maritime mobile service in accordance with the provisions of the Radio Regulations are assigned to coast stations.
2. In the Plan, for the Union of South Africa, the Territories under mandate of South-West Africa, Northern Rhodesia and Southern Rhodesia, the band 200 - 285 kc/s is allocated to the aeronautical radionavigation and aeronautical mobile services, in accordance with the provisions of paragraph 119 of the Radio Regulations.
3. In the Plan, no frequency has been assigned in the bands 160 - 200 kc/s and 525 - 535 kc/s, either as a general allocation to broadcasting, or exceptionally to the fixed or mobile services, as provided for by paragraphs 119 and 142 of the Radio Regulations, for the countries mentioned in paragraph 2 above, since no requirements have been submitted.
4. Frequencies indicated in the Plan in the bands 150 - 285 kc/s and 525 - 1605 kc/s shall be used by broadcasting stations for A3 type transmission only.
5. No assignment has been made to coast stations :
  - 5.1 in the band 405 - 415 kc/s which is allocated essentially to radio direction finding service,
  - 5.2 in the band 490 - 510 kc/s which is reserved for distress, calling and reply,
  - 5.3 among the frequencies 425 kc/s, 454 kc/s, 468 kc/s, 480 kc/s, 512 kc/s, which are reserved for ship stations, account being taken of the provisions of paragraph 732 of the Radio Regulations in the case of the frequency 512 kc/s.
- 6.1 In the Plan, the separation between adjacent channels used by coast stations is, in most cases, 3 kc/s.  
However, in order that the channels may be identical with those adopted at Copenhagen, for convenience of operation, this spacing has been reduced in a few cases.
- 6.2 The separation between adjacent channels, used by coast stations on the one hand and ship stations on the other, is 4 kc/s.
- 6.3 The following frequencies are assigned to coast stations:

|          |          |          |          |
|----------|----------|----------|----------|
| 416 kc/s | 438 kc/s | 461 kc/s | 489 kc/s |
| 418 kc/s | 441 kc/s | 464 kc/s | 516 kc/s |
| 421 kc/s | 444 kc/s | 472 kc/s | 519 kc/s |
| 429 kc/s | 447 kc/s | 476 kc/s | 522 kc/s |
| 432 kc/s | 450 kc/s | 484 kc/s | 524 kc/s |
| 435 kc/s | 458 kc/s | 487 kc/s |          |

SECTION II

TABLE SHOWING DISTRIBUTION OF FREQUENCIES

- 1.1 The table below shows the distribution of frequencies in the bands 150 - 285 kc/s and 415 - 1605 kc/s among the stations of the African Area classified in numerical order of frequencies.
- 1.2 Stations using the same frequency are shown in the table in the alphabetical order of the abbreviations used by the I.T.U. in its publications for countries to which they belong and stations in the same country are shown in the alphabetical order of their official designations.
- 2.1 Provision has been made in the Plan for the requirements of the Administrations of the African Area, which are signatories to the Plan and to those countries non signatory.
- 2.2 Also included in the table are frequencies known to be in use or notified by Administrations of countries who are not Members of the International Telecommunication Union; this inclusion implies no recognition by the Union of the status of those Administrations in relation to the Union.

The undersigned delegates of the Administrations of Region 1 present in Geneva and meeting according to a Resolution adopted by the Administrative Council of the International Telecommunication Union at its 4th Session on September 19th, to prepare a frequency plan for the bands 160-285 kc/s and 415-1605 kc/s in the African Area, having approved the plan of the Committee together with its preamble, declare their agreement to sending the plan and its preamble to the P.F.B. for inclusion in the draft new International Frequency List which will be reviewed and approved by the Special Administrative Conference.

It is understood that Administrations retain the right to submit, if it should be found necessary, certain amended or additional requirements at the time of the Special Administrative Radio Conference.

Those Administrations of the African Region, non-signatory to these Final Acts, may notify to the Secretary General their subsequent approval if they so desire.

Done at Geneva, 28 September 1949
